

NEWS RELEASE

CAMBRIDGE UNIVERSITY DEPARTMENT OF ENGINEERING

Keeping it local

Strata Panels UK of Warboys, Cambridgeshire have recently supplied Cambridge University Department of Engineering with 120 MDF custom made desk cabinets to fit inside existing student CAD work benches.

"Strata Panels were excellent." Alistair Ross of Cambridge University Department of Engineering said "they did what we asked; a prototype was made to check design and finish. Strata committed to the tight delivery date while the students were on Easter break and delivered before that date was due."

"The first batch of cabinets were delivered within 2 weeks of the confirmed order" said Mark Garrood Sales Director of Strata Panels UK "We were able to advise on design improvements, as our CNC machine is able to drill dowel holes in order to achieve a streamlined finish."

As an approved Cambridge University supplier, Strata Panels UK; local contract joinery company look forward to fulfilling further interesting projects.
